Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Zieve (US 4,862,043).

With regard to claim 1, Zieve discloses a hand-guided working tool (fig. 17) for driving fastener elements including nail, bolts or pins into a substrate, having a voltage source (capacitors 158) for supplying an electrical circuit including electrical consumers such as coils (43, 45) on the working tool; and arranged on the working tool (fig. 17).

The capacitor as shown in Figure 17 is connected to the discharge side of the electrical circuit comprising electrical consumer (coils 43, 45).

With regard to claim 2, Zieve shows at least one capacitors are equipped with a connecting port (165) for an external power source (30).

With regard to claim 3, Zieve shows removable capacitors (31, 35) arranged in the receptacle of the tool and connected to the electrical consumer via contacts (36, 37 fig. 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3721

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zieve

With regard to claim 4, although Zieve disclose the range of capacitance less than 5F-10,000F as claimed, it would have been obvious to one skilled in the art to provide the tool of Zieve with capacitors having capacitance in the range of from 5F - 10,000F as desired since it is expedient of the skilled artisan who is concerned with different ranges of capacitance to meet the need of the user.

With regard to claim 5, Zieve shows capacitors bank (31, 35) interconnected to form an as energy storage module energy storage module.

With regard to claim 6, Zieve shows a control circuit (32, 33) connected downstream to a capacitor (31, 35) where electrical energy supplied to electrical consumers is regulated.

With regard to claims 7 and 8, The examiner takes Official Notice that control circuit is well known to have two or more controllers (resistors).

Response to Arguments

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathaniel C. Chukwurah whose telephone number is (571) 272-4457. The examiner can normally be reached on M-F 6:00AM-2:30PM.
